

Linking Parcels to Deeds

Summary

The Town of Bar Harbor uses GIS to link parcel data to deed records at the Hancock County Registry of Deeds allowing staff and the public easy access to parcel and deed records through the Web. The same system is also used to link zoning, and other records into one centralized information portal.

This was a live demonstration of Bar Harbor's new WebGIS system and integration of deed information from the Hancock County Registry of Deeds website. This system is available to the public and be accessed by clicking [here](#).

If you have questions regarding the Town of Bar Harbor Web GIS system Please contact
